

First MCV Volvo B7RLEs

MCV Volvos will operate between Moreton and Cheltenham

Pulhams Coaches has taken delivery of the first MCV-bodied Volvo B7RLEs for a UK operator, a new combination that has been marketed by Volvo since last year.

The three 44-seaters are for 26-mile route 801 linking Moreton-in-Marsh with Cheltenham via Bourton-on-the-Water, Pulhams' base.

Pulhams Coaches Director, Andy Pulham had the opportunity to see the MCV production facility

at first hand. "Volvo Bus Regional Sales Manager, Phil Fletcher took me out to Egypt to see it for myself," he said. "I have to say I really was impressed. It's a huge facility and really professionally run. I think the finish and styling of the MCV body on the B7RLE is really quite striking and I know I've also got the reliability and durability of the Volvo chassis underneath, it becomes a really attractive package for us."
